

Objective 38: Increase the proportion of children who receive dental care

Maryland SHIP Vision Area 6: Healthcare Access

Tools, Resources, and Promising Practices

updated February 2012

Information, Facts, and Figures

[Dental Sealants](#)

Includes information about dental sealants to protect children and teens from tooth decay.

[Oral Health Factsheets for Parents](#)

Includes information and tips for parents to help their children have healthy teeth.

Maryland Services and Hotlines

[The National Dental Life Network](#)

Nationwide network with resources in all 50 states to assist in the identification of providers who provide reduced cost dental care. Affiliated with the Maryland State Dental Association locally.

[Find a Pediatric Dentist](#)

Database and resource for pediatric dentistry. Find a local provider and learn additional information about the importance of dental care for children.

[Find Dental Care](#)

Find dental care for your children and access basic information and other resources provided by local dental associations.

[Maryland Office of Oral Health](#)

Resources pertaining to access of oral health services in Maryland.

Personalized Tools

[Oral Health Media Messages](#)

Links to health e-cards related to oral health for kids.

Promising Practices

[The Community Guide—Oral Health](#)

Provides Task Force recommendations and findings as well as results from interventions to improve oral health in communities.

[Children's Dental Health Project Programs](#)

National, state, and local programs focused on improving children's oral health through access and education.

[Children's Oral Health Initiatives](#)

Programs created by the Children's Oral Health Institute to target children and families.

Toolkit

[National Maternal & Child Oral Health Resource Center](#)

Provides resources, publications, projects, and tools to help states and communities to improve public oral health.

["Give Kids A Smile" Program](#)

This program planning toolbox is perfect for clinicians and planners. The resources provided surround planning an event to promote adolescent oral health care.
